

# PROP DEFENDER

## PROPELLER FOULING PROTECTION

### **SAVES FUEL & IMPROVES SPEED**

*Marlowe Von Groote are leading the propeller revolution*

*Following 12 years of development, the company has released Prop Defender a new solution to keep propellers and running gear free from fouling.*

**Prop Defender** is supplied as a comprehensive kit containing all parts needed for application, which is simple and easy for both owners and professionals

Designed to last, the coating creates a super slippery surface to which marine growth simply cannot adhere and is flushed off by propeller revolution. **Prop Defender** emulates the intelligent dolphin, streamlined, slick, right at home in the Ocean, slides through the water with ease and elegance.

Unlike other products on the market Prop Defender does not use aggressive primers and is completely free of toxins, solvents, VOC's and biocides.

As a non hazardous product it can be delivered direct in the standard mail – passing on big savings to captains and owners. The 400ml kit will treat nearly 9 ft<sup>2</sup> of propeller and stern gear surfaces and at less than £60 including VAT and UK mainland delivery. The result? **Prop Defender** pays for itself in fuel savings alone in less than 2 months.

The finished coat is glass reinforced for toughness and its clear gleaming appearance gives a super tough glossy finish for lasting propeller protection. **Prop Defender** can be applied with confidence on stainless steel, nibral, bronze and aluminium

### Where can I get Prop Defender?

The kit can be posted by normal mail as it is free of solvents, toxic chemicals, hazardous ingredients or biocides. This means **Prop Defender** can be purchased from [www.propdefender.com](http://www.propdefender.com) for next day delivery (UK Mainland).

### How easy is it to apply?

Effortless to apply by the boat owner or professional applicator alike. There are no complex primers and no tight timescales for over-coating. Prepare and apply quickly or slowly, your choice. The application instructions are straight forward to follow, thoroughly tested and by following the detailed advice, users will achieve perfect protective coating.

### How long will it last?

**Prop Defender** is effective and durable and should last a minimum of one whole season, probably more. The coating does not wear out its only enemy is damage or abrasion.

**Prop Defender** is unaffected and will not lose any of its properties if kept out of the water.

### Is it expensive?

Due to its advanced technology, **Prop Defender** is probably the most economical system on the market. It will save fuel and improve efficiency and usually pays for itself in a matter of weeks or months.

It is available direct to the customer, buyers save on price. Boating is expensive enough, but **Prop Defender** is affordable, effective, safe and easy to apply, meaning buyers save money.

### What can I use it on?

Propellers, rudders, underwater lights, trim tabs, shafts, bow thrusters.
